

CRYSTALUS 06

Attention to detail and captivating inspiration in lighting design

A sparkling water droplet of brilliant beauty is followed by a gleaming tail, likened only to stardust. The interplay of crystal glass perfection and superior design technology inspire a feeling of organic harmony.

Purity of form combined with striking proportions make Crystalus 06 a desired lifestyle accessory for private living spaces or a captivating eye-catcher in public environments.

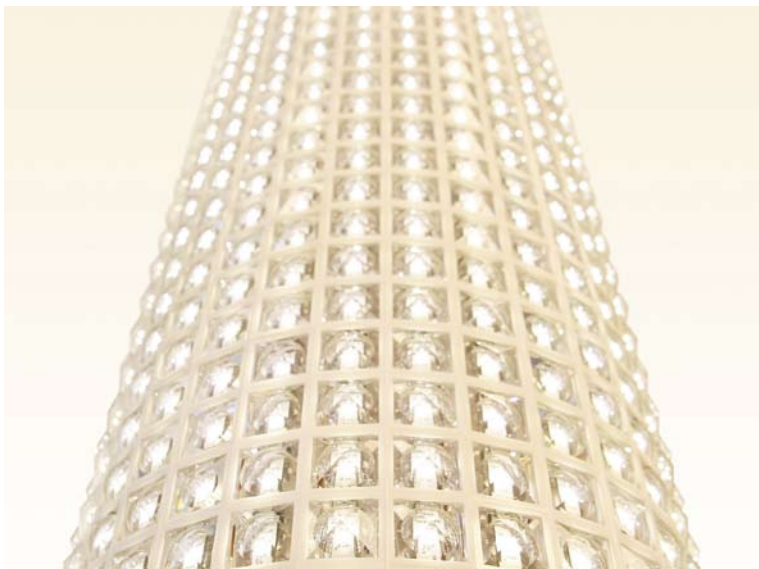

CRYSTALUS 06

„When I designed Crystalus I wanted to use crystal glass and thought about a cylindrical shape. I wanted my installation to look like a waterfall: magnificent and striking in proportions, captivating but not nervous. My intention was to create an elegant light installation, which enhances the atmosphere of any space with harmonious lighting effects.”

(Maik Picker, Crystalus Designer)

Finished in brushed stainless steel Crystalus 06 blends exquisite materials and state of the art technology with exceptional quality and precision.
